What is ECL AI TRADING BOT?

ECL AI TRADING BOT is a cutting-edge, AI-powered trading software designed to work with your Binance account using secure API integration. It executes real-time trades in the crypto markets by analyzing data using intelligent algorithms — so you can earn passive income without spending hours watching charts.

How It Works

After you purchase your copy, our team will install and configure your personal bot on your own hosting/server — ready to trade securely and autonomously.

✅ Connect Your Binance API

We securely link your Binance account using your personal API key. You retain full control — your funds stay in your own account at all times.

✅ AI-Powered Decision-Making

Our advanced algorithm continuously scans the market in real time to identify and predict profitable trades across Spot, Margin, and Futures markets.

✅ Automated Trade Execution

Once connected, the bot autonomously places trades, using 10% of your available capital per transaction to maximize opportunities while managing risk.

✅ Consistent Returns

Designed to deliver up to 25 - 100% returns on individual trades, the bot averages around 10 - 20% profit daily based on your total capital.

API Setup Guide

To ensure smooth and secure trading, please enable the following permissions when creating your Binance API:

- 🔹 Enable Reading
- 🔹 Enable Spot & Margin Trading
- 🔹 Enable Futures Trading

🔒 Security First: Your API keys are only stored on your server — never shared or exposed to third parties.

Why Choose ECL AI TRADING BOT?

💡 **Powered by Advanced AI**
Make smarter, faster, data-driven decisions 24/7.

🔐 **Unmatched Security**
We never have access to your funds — full control remains with you.

📊 **Real-Time Transparency**
Monitor all trades, profits, and analytics through your personalized dashboard.

🛠️ **Done-For-You Setup**
We install and configure the bot on your hosting/server, ready to start trading.

💸 **Profit-Focused Trading**
Achieve passive income growth with a bot designed for consistent profitability.

Getting Started

1. Purchase Your Copy
2. We Set Up Your Bot on Your Hosting/Server
3. Connect Your Binance API with the required permissions
4. Relax and Watch Your Automated Earnings Grow!
